

THE LAST SIGNAL

*When the world went silent,
something beneath it started calling.*

Thirty-seven years after
the blackout, the world
forgot how to speak.

Broken phones...

Dead screens...

Abandoned
satellite dishes...

A forgotten station...

Useful scrap...

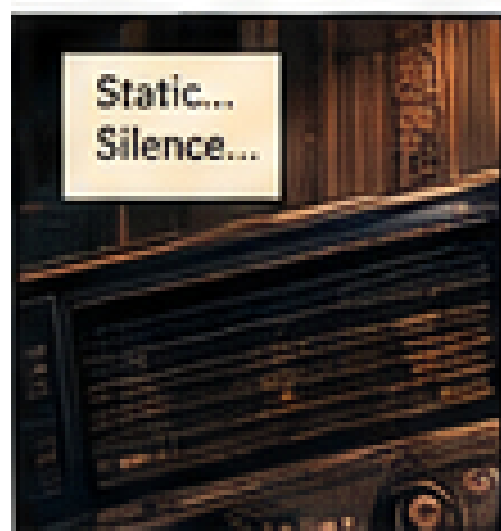

And a boy...
who refused
to give up.

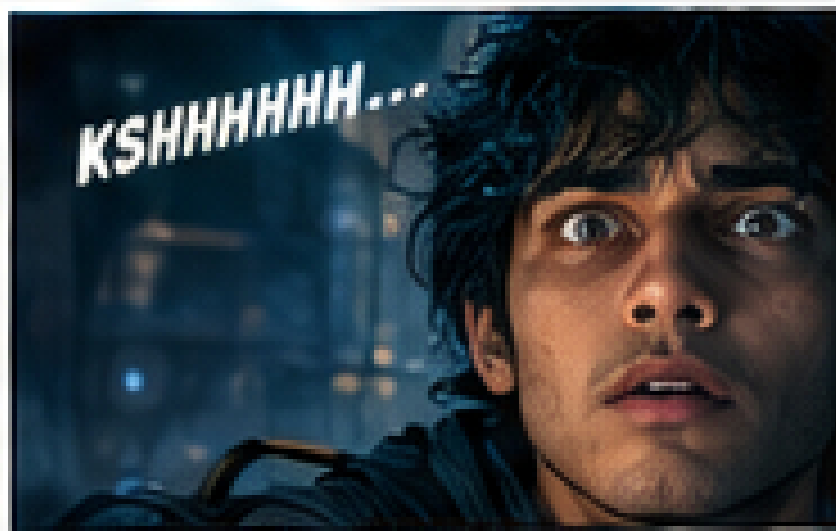

He turned
the dial...

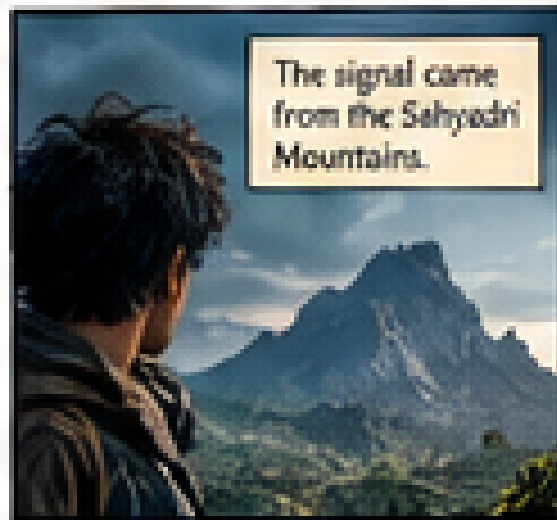

Static...
Silence...

KSHHHHHH...

...RETURN... 731:...

The signal came
from the Sahyadri
Mountains.

Something beneath
the dead world was
still alive.

He followed
the signal...

...through
abandoned roads...

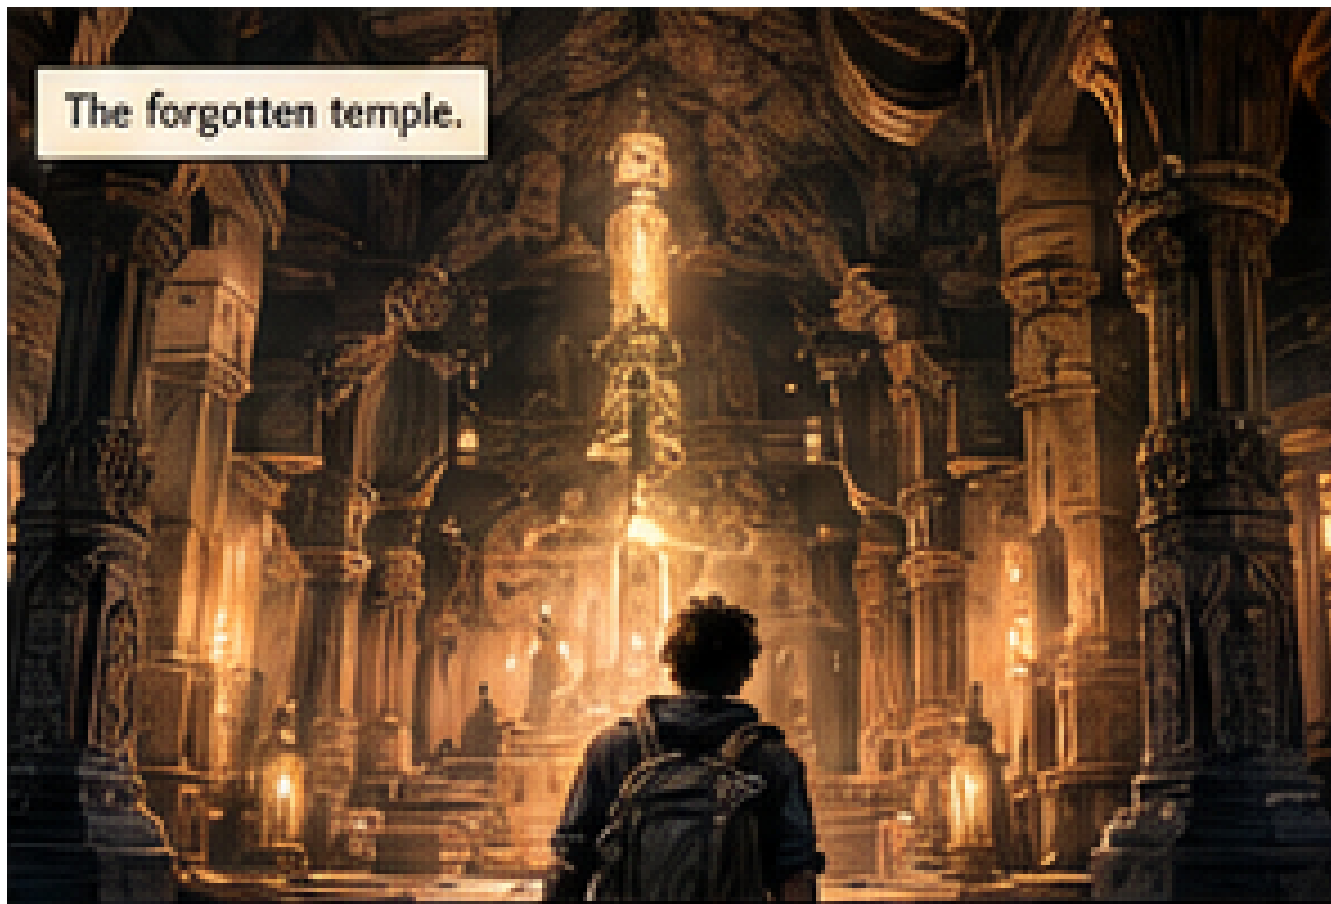

...and ruined towers...

Until he found
the symbol...

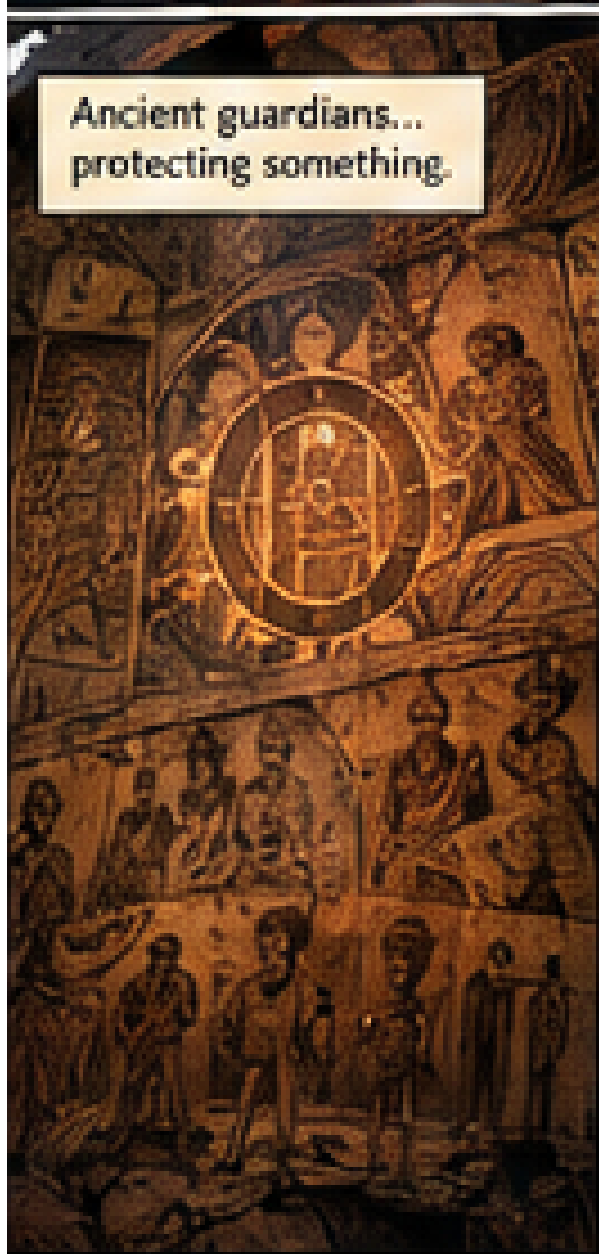

What are you?

A hidden door
opened beneath
the mountain.

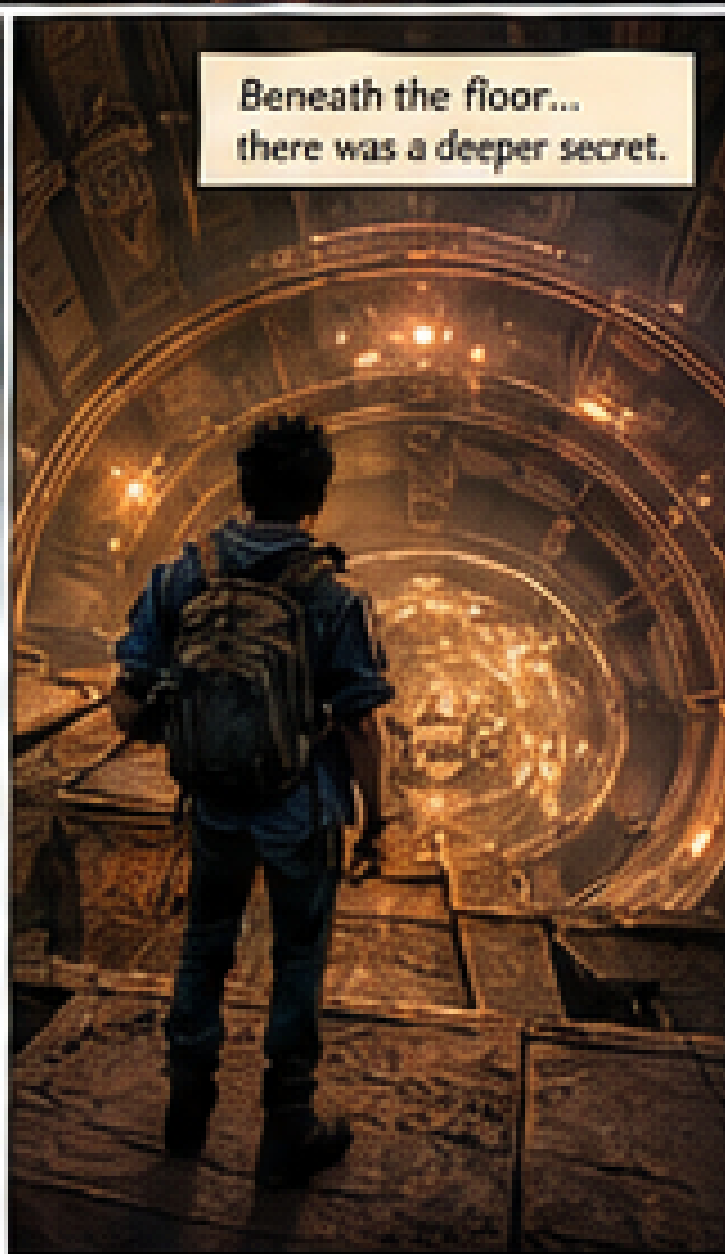

The forgotten temple.

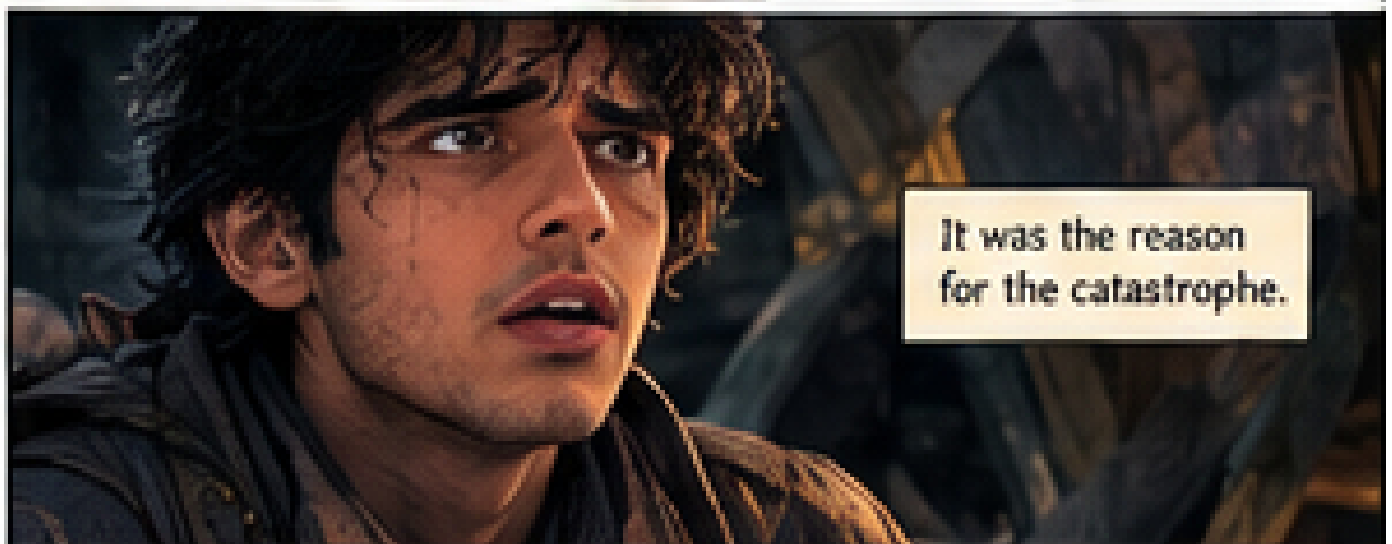

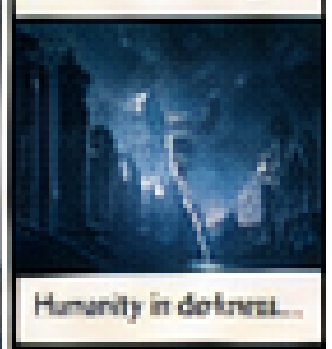

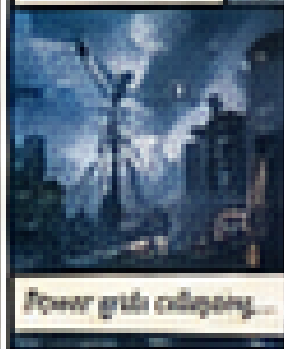

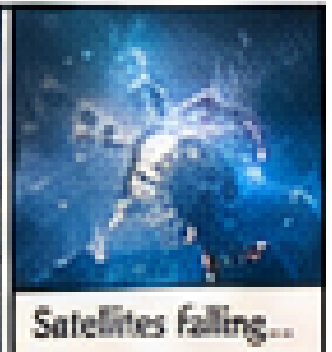

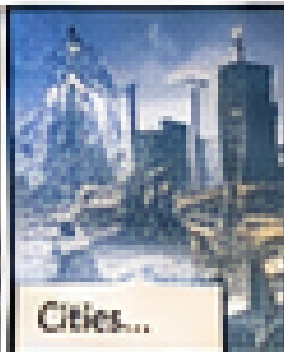

Ancient guardians...
protecting something.

Beneath the floor...
there was a deeper secret.

The Pran-Yantra.

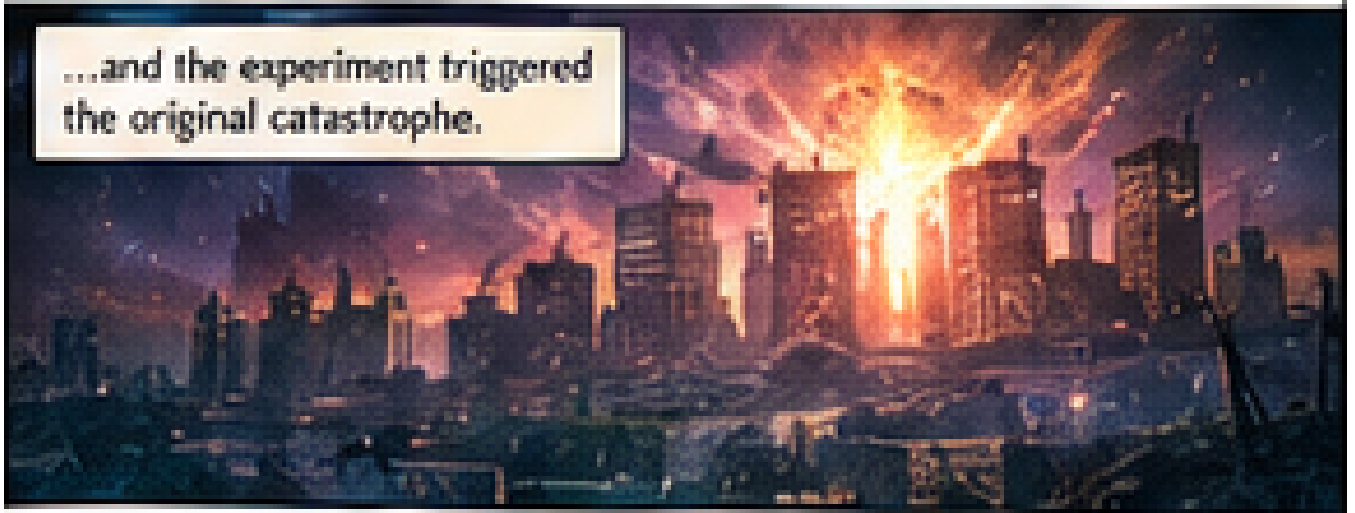

Centuries ago, the guardians
sealed the Pran-Yantra underground.

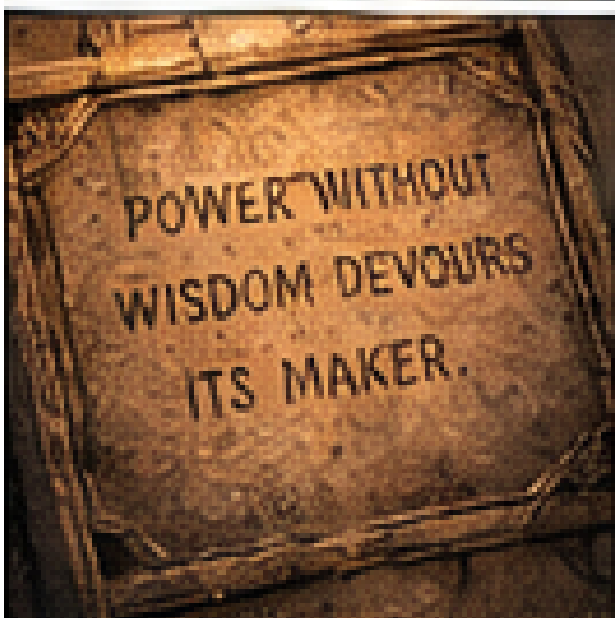

Later, a civilization discovered it...

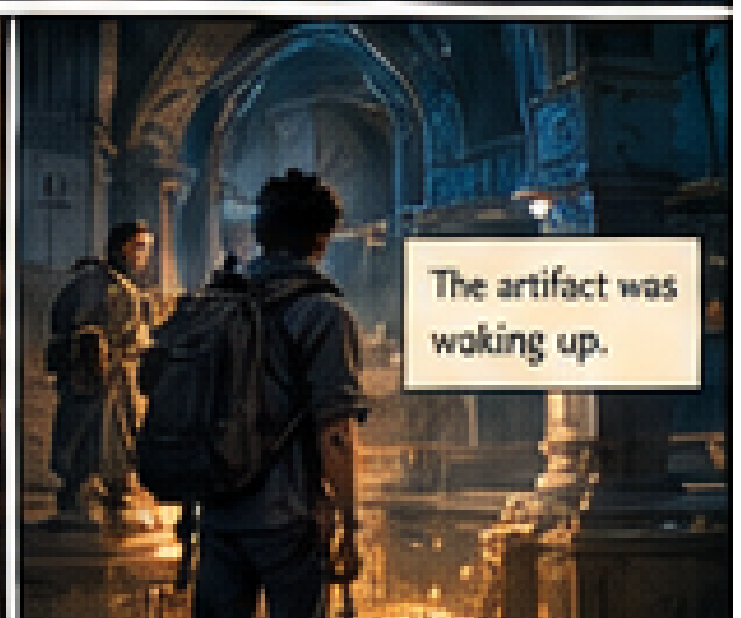

...and the experiment triggered
the original catastrophe.

POWER WITHOUT
WISDOM DEVOURS
ITS MAKER.

The artifact was
waking up.

Two futures...

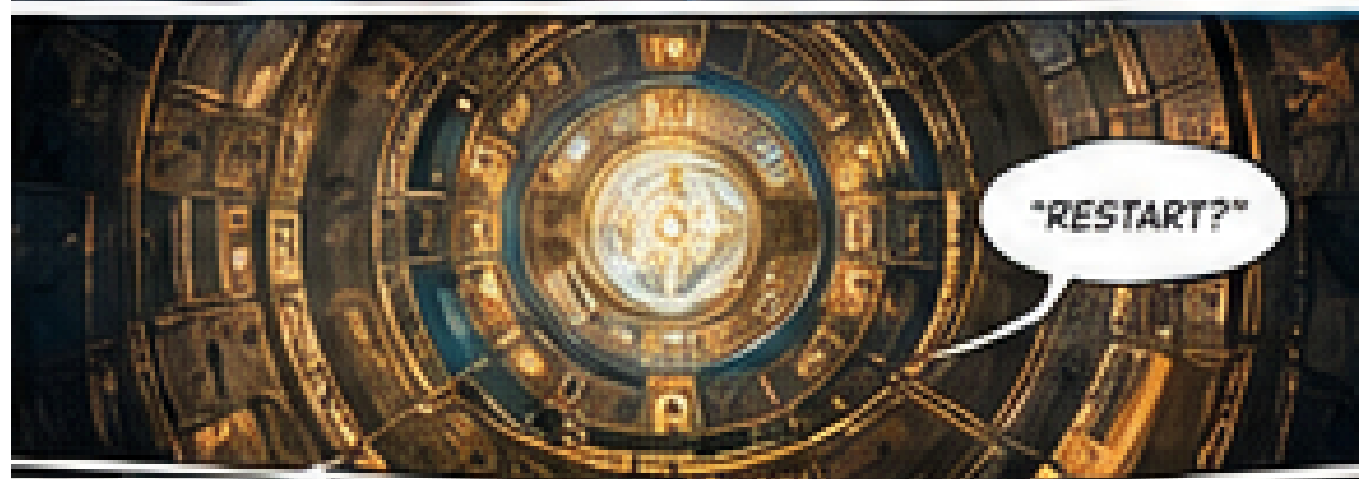

REBOOT

Power returns.
Cities rebuild.
But the planet's
energy will be consumed.

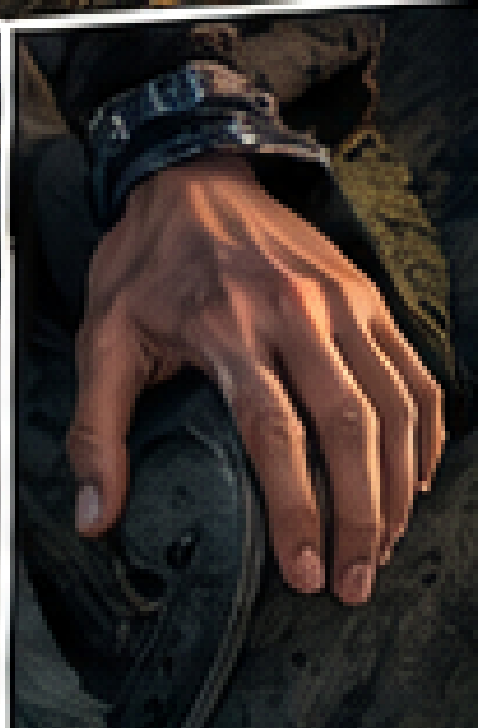

SURVIVE

Humankind remains
technologically primitive.
But we live.

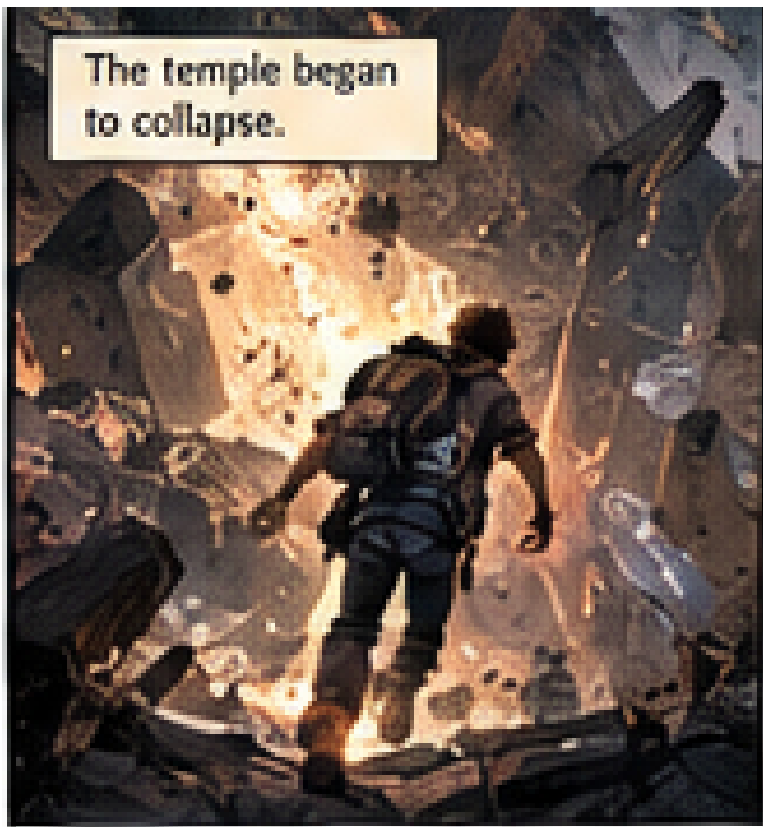

"RESTART?"

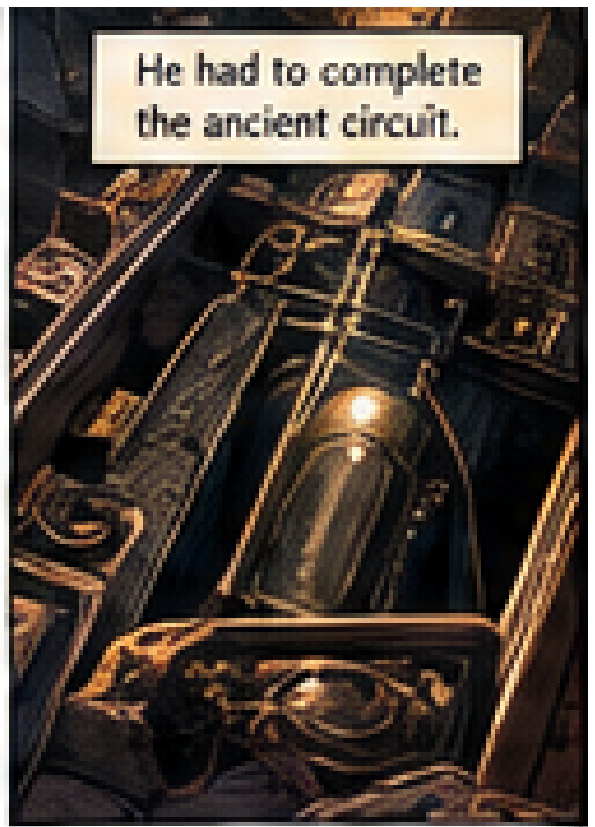

He had a choice...

The temple began
to collapse.

He had to complete
the ancient circuit.

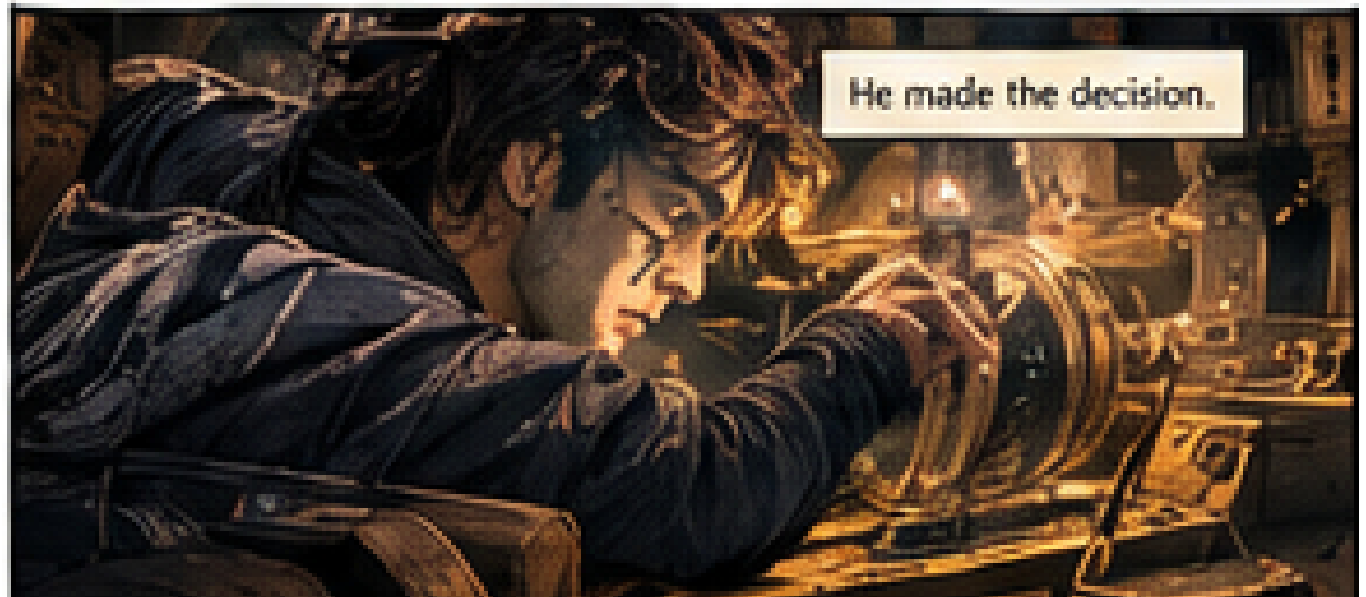

It might kill him.

RETURN...
RETURN...
RETURN...

He made the decision.

Years later...

The world was still primitive. But it was alive.

KSHHHHH...

SIGNAL 2

And then...

The world had survived.
But the signal had only begun.

THE END... FOR NOW.
